

§ 54.607 Determining the rural rate.

(a) The rural rate shall be the average of the rates actually being charged to commercial customers, other than health care providers, for identical or similar services provided by the telecommunications carrier providing the service in the rural area in which the health care provider is located. The rates included in this average shall be for services provided over the same distance as the eligible service. The rates averaged to calculate the rural rate must not include any rates reduced by universal service support mechanisms. The “rural rate” shall be used as described in this subpart to determine the credit or reimbursement due to a telecommunications carrier that provides eligible telecommunications services to eligible health care providers.

(b) If the telecommunications carrier serving the health care provider is not providing any identical or similar services in the rural area, then the rural rate shall be the average of the tariffed and other publicly available rates, not including any rates reduced by universal service programs, charged for the same or similar services in that rural area over the same distance as the eligible service by other carriers. If there are no tariffed or publicly available rates for such services in that rural area, or if the carrier reasonably determines that this method for calculating the rural rate is unfair, then the carrier shall submit for the state commission’s approval, for intrastate rates, or the Commission’s approval, for interstate rates, a cost-based rate for the provision of the service in the most economically efficient, reasonably available manner.

(1) The carrier must provide, to the state commission, or intrastate rates, or to the Commission, for interstate rates, a justification of the proposed rural rate, including an itemization of the costs of providing the requested service.

(2) The carrier must provide such information periodically thereafter as required, by the state commission for intrastate rates or the Commission for interstate rates. In doing so, the carrier must take into account anticipated and actual demand for telecommunications services by all cus-

tomers who will use the facilities over which services are being provided to eligible health care providers.

§ 54.609 Calculating support.

(a) Except with regard to services provided under § 54.621 and subject to the limitations set forth in this subpart, the amount of universal service support for an eligible service provided to a rural health care provider shall be the difference, if any, between the urban rate and the rural rate charged for the service, as defined herein. In addition, all reasonable charges that are incurred by taking such services, such as state and federal taxes shall be eligible for universal service support. Charges for termination liability, penalty surcharges, and other charges not included in the cost of taking such service shall not be covered by the universal service support mechanisms.

(b) Except with regard to services provided under § 54.621, a telecommunications carrier that provides telecommunications service to a rural health care provider participating in an eligible health care consortium must establish the applicable rural rate for the health care provider’s portion of the shared telecommunications services, as well as the applicable urban rate. Absent documentation justifying the amount of universal service support requested for health care providers participating in a consortium, the Administrator shall not allow telecommunications carriers to offset, or receive reimbursement for, the amount eligible for universal service support.

(c) The universal service support mechanisms shall cover reduced rates on intrastate telecommunications services, as set forth in § 54.101(a), provided to rural health care providers as well as interstate telecommunications services.

[62 FR 32948, June 17, 1997, as amended at 62 FR 41305, Aug. 1, 1997; 63 FR 2131, Jan. 13, 1998; 63 FR 70572, Dec. 21, 1998]

§ 54.611 Distributing support.

(a) A telecommunications carrier providing services eligible for support under this subpart to eligible health care providers shall treat the amount eligible for support under this subpart

Federal Communications Commission

§ 54.615

as an offset against the carrier's universal service support obligation for the year in which the costs for providing eligible services were incurred.

(b) If the total amount of support owed to a carrier, as set forth in paragraph (a) of this section, exceeds its universal service obligation, calculated on an annual basis, the carrier may receive a direct reimbursement in the amount of the difference.

(c) Any reimbursement due a carrier shall be made after the offset is credited against that carrier's universal service obligation.

(d) Any reimbursement due a carrier shall be submitted to that carrier no later than the end of the first quarter of the calendar year following the year in which the costs were incurred and the offset against the carrier's universal service obligation was applied.

§ 54.613 Limitations on supported services for rural health care providers.

(a) Upon submitting a bona fide request to a telecommunications carrier, each eligible rural health care provider is entitled to receive the most cost-effective, commercially-available telecommunications service using a bandwidth capacity of 1.544 Mbps, at a rate no higher than the highest urban rate, as defined in this subpart, at a distance not to exceed the distance between the eligible health care provider's site and the farthest point from that site that is on the jurisdictional boundary of the nearest large city, as defined in § 54.605(c).

(b) The rural health care provider may substitute any other service or combination of services with transmission capacities of less than 1.544 Mbps transmitted over the same or a shorter distances, so long as the total annual support amount for all such services combined, calculated as provided in this subpart, does not exceed what the support amount would have been for the service described in paragraph (a) of this section. If the rural health care provider is located in an area where a service using a bandwidth capacity of 1.544 Mbps is not available, then the total annual support amount for that provider shall not exceed what the support amount would have been

under paragraph (a) of this section, calculated using the rural rate for a service of that capacity in another area of the state.

(c) This section shall not affect a rural health care provider's ability to obtain supported services under § 54.621.

§ 54.615 Obtaining services.

(a) *Selecting a provider.* In selecting a telecommunications carrier, a health care provider shall consider all bids submitted and select the most cost-effective alternative.

(b) *Receiving supported rate.* Except with regard to services provided under § 54.621, upon receiving a bona fide request for an eligible service from an eligible health care provider, as set forth in paragraph (c) of this section, a telecommunications carrier shall provide the service at a rate no higher than the urban rate, as defined in § 54.605, subject to the limitations set forth in this Subpart.

(c) *Bona fide request.* In order to receive services eligible for universal service support under this subpart, an eligible health care provider must submit a request for services to the telecommunications carrier, Signed by an authorized officer of the health care provider, and shall include that person's certification under oath that:

(1) The requester is a public or non-profit entity that falls within one of the seven categories set forth in the definition of health care provider, listed in § 54.601(a);

(2) The requester is physically located in a rural area, unless the health care provider is requesting services provided under § 54.621;

(3) If the health care provider is requesting services provided under § 54.621, that the requester cannot obtain toll-free access to an Internet service provider;

(4) The requested service or services will be used solely for purposes reasonably related to the provision of health care services or instruction that the health care provider is legally authorized to provide under the law in the state in which such health care services or instruction are provided;

(5) The requested service or services will not be sold, resold or transferred
